CT UV UF

Purella Features

- Fully automatic
- 8 liter capacity purified water storage tank
- Purification capacity of 30 LPH
- 5 stages of Purification

HF UF

Purella Features

- On line purification
- Wall mount, space saving elegant design
- Purification capacity of 30 LPH
- 4 stages of Purification
- Does not require Electricity

R-PLATINA

Purella Features

- Fully automatic
- Built in SMPS to operate within 160 V- 290 V AC Voltage
- Push-fit connectors for leak- proof and maintenance free performance
- Suitable for water up to 2000 PPM TDS
- Dry run protection of pump
- Unique membrane cleaning system to ensure superior & effective membrane performance
- ABS Construction and corrosion free life span
- RO with UV/UF Filtration
- Water available on demand even without power
- Ensures a constant refill into the tank & makes water available
- TDS controller to adjust desire taste
- Purification capacity of 12-15 LPH
- 8 ltrs. storage capacity
- 7 stages of Purification

E-PLATINA

Purella Features

- Purification Capacity 8 TO 10 Liters/Hour
- Blocks Inlet water supply when no power is available to the system or system is not purifying.
- Protects against power fluctuation
- Water availability on demand even with out power
- 5 stage purification
- Fully automatic
- Push fit connectors for leak-proof and maintenance free performance
- Suitable for water up to 2000 PPM TDS
- Ensures a constant refill into the tank & makes water available.
- ABS Construction and corrosion free life span
- Unique membrane cleaning system to ensure superior & effective membrane performance
- Food grade engineering plastic construction and corrosion free life span

UTC Blue with Tank

Purella Features

- Built in SMPS to operate within 160 V- 290 V AC Voltage
- Push-fit connectors for leak- proof and maintenance free performance
- Suitable for water up to 2000 PPM TDS
- Dry run protection of pump
- Wall mount
- 5 stage filtration
- Convenient for taking water directly to utensils
- Unique membrane cleaning system to ensure superior & effective membrane performance

M-PLATINA

Purella Features

- Fully automatic
- Built in SMPS to operate within 160 V- 290 V AC Voltage
- Push-fit connectors for leak- proof and maintenance free performance
- Suitable for water up to 2000 PPM TDS
- Dry run protection of pump
- Unique membrane cleaning system to ensure superior & effective membrane performance
- Food grade engineering plastic Construction and corrosion free life span
- Water available on demand even without power
- Ensures a constant refill into the tank & makes water available
- Purification capacity of 10-12 LPH
- 7 ltrs. storage capacity
- 5 stages of Purification

PURELLA GENERAL FEATURES

- Push-fit connectors for leak - proof and maintenance free performance
- Dry run protection of pump
- Built in SMPS to Operate within 160V-290V AC Voltage

Recommended Input Water Conditions

Total Dissolved Solids	2000 ppm
Total Hardness	250 ppm
Input Water Temperature	10-40° C
PH	6.5-8.5
Iron Content	0.1 mg/li (Max)
Inlet Pressure	0.5 kg/cm ² (Min)

As part of continuing research and development programme, specifications are subject to change without prior notice.
